ABOUT

Eager and dedicated DevOps fresher with hands-on expertise in Jenkins, Kubernetes, Terraform, Docker, Ansible, Git, AWS, and Linux. Proficient in CI/CD pipelines, containerization, infrastructure as code (IaC), and cloud deployments. Skilled in automating build and deployment pipelines, managing Docker containers, and deploying applications on AWS. Committed to continuous learning and eager to contribute to a fast-paced DevOps environment. Seeking opportunities to utilize technical skills and drive efficiency in a dynamic DevOps setting.

EDUCATION

Bachelor of Technology - Computer Science & Engineering

(2020 – 2024)

Shivaji University Kolhapur

CGPA: 7.50/10

SKILLS

LANGUAGES: C, HTML, CSS

Cloud: AWS (EC2, IAM, S3, VPC, ELB, CloudWatch).

Containerization: Docker, Kubernetes.

Linux Administration: User & Group management, Permission, Package installation, Disk Management, Backup/Restore (rsync, tar), Basic Troubleshooting.

CI/CD: Jenkins.

Infrastructure as Code: Terraform, Ansible.

Version Control: Git, HitHub.

Other Tools: Maven, Apache, Tomcat.

WORK Experience

Ubuntu Engineer -(Sujata Computers)

(feb-2025 – April-2025)

I worked as an Ubuntu Engineer at Sujata Computers where I was responsible for installing, configuring, and maintaining Ubuntu-based systems. I handled user account management, package updates, network configuration, and basic shell scripting. I also worked on system troubleshooting, backups, and system performance optimization.

Internship

DevOps Intern –Seven-Mentor (6 Months)

- Gained hands-on experience in CI/CD, configuration management, and cloud deployment.
 - Worked on DevOps tools: GitHub, Jenkins, Maven, Ansible, Docker, Docker Hub, Kubernetes, Prometheus, AWS EC2.
 - Configured Jenkins pipelines for automated build and deployment Automated server setup using Ansible playbooks.
 - Built and deployed Docker containers in Kubernetes clusters Integrated Prometheus for system monitoring and performance tracking Collaborated with team members to troubleshoot and resolve deployment issues
-

PROJECTS

CI/CD DevOps Project- Automated Software Deployment. | [GitHub](#) |

(June 2025 – July 2025)

- Developed and deployed a CI/CD pipeline using Jenkins Freestyle Job to automate the build and deployment process of a Java-based Registration WebApp.
- Source code managed using GitHub (webapps repo) Jenkins configured to fetch code and build WAR file using Maven WAR file deployed to Apache Tomcat server hosted on AWS EC2 (Windows) Achieved end-to-end automation from code push to deployment.

CI/CD Pipeline for Java-Based Registration Web Application. | [GitHub](#)

- Tools & Technologies: GitHub, Jenkins, Maven, Ansible, Docker, Docker Hub, Kubernetes, Prometheus
- Repository: <https://github.com/shravan-12345/DevOps-Project.git> Configured Jenkins jobs for automated build & deployment Automated server setup using Ansible playbooks.
- Built and pushed Docker images to Docker Hub Deployed containers on Kubernetes clusters Integrated Prometheus for monitoring Managed multi-environment setup (dev1-Mumbai, dev2-Singapore).
